DENOMINATION:

Countertop gas cookers GN. 2 high power burners, 900 range.

DESCRIPTION :

"- Stamped surface tops, manufactured in
2 mm thick AISI-304 stainless steel.
- Laser-cut joints, automatic welding and
polishes. Screws hidden from view.
- Hobs with dimensions 397 x 350 mm
allowing the use of large pans and pots.
The shortened distance between
the central prongs, 75 mm, allows them to
support pans with a very small diameter
(8 cm). This also avoids the danger of small
containers tipping over.
- The hobs are manufactured in RAAF
enamelled cast iron (resistant to
acid and alkali products, and to fire and high
temperatures).
- Double crown burners and diffusers in
nickel-plated cast iron, guaranteeing the
even distribution of heat from the
flame in the bottom of the pans,
even large ones. This avoids the
accumulation of heat at a single
point and optimises the energy transfer of
the product.
- Burners slot back in with no way of
confusing their position.
- Low consumption pilots and thermocouples
positioned within the body of the burner for
greater protection.
- Gas conduction in flexible stainless steel
tubes, making internal manipulation easier
and facilitating any repair work.
- Controls set on a protective base with a
system against water infiltration.
- High temperature enamelled cast iron flue
protector aligned with the hobs, facilitating
manoeuverability and supporting larger
containers, increasing useful surface area.
- Access to the components from the front.
-Machines with IPX5 grade water protection"

POSSIBLE OPTIONS :

- 230 1N- Transformation A 230 V single phase
- 230 III - A 230 V three-phase transformation without neutral
